This action was taken as a result of the recently expanded recall by Peanut Corporation of America (PCA) to include all peanut ingredients produced in their Blakely, Georgia facility. None of the recalled products have been directly linked to the salmonella outbreak, and there have been no illnesses reported.

Salmonella is an organism that can cause serious and sometimes fatal infections, particularly in young children, the elderly, and persons with weakened immune systems. Healthy persons infected with Salmonella often experience fever, diarrhea, nausea, vomiting and/or abdominal pain. In rare circumstances, infection with Salmonella can result in the organism getting into the bloodstream and producing more severe illnesses, such as arterial infections (i.e. infected aneurysms), endocarditis, and arthritis.

Consumers who have purchased the recalled products are urged to destroy them but retain the Best By and/ or Lot Code found on the package. Consumers with questions may contact the Customer Service at 1-800-289-4525 between 9 AM and 5 PM EST Monday through Friday. Consumers with questions or concerns about their health should contact their doctor.
